

LoanXchain by MSD Solutions SRL

Milan, Italy
Established in 2017

Digital secondary loan marketplace for financial institutions

The company

We believe in a functioning and fair financial system as the foundation of democracy. A system where savers get positive returns because have positive impact financing the real economy: corporates and households.

LoanXchain, the first digital secondary loan marketplace in Europe, answer people's need by tackling the financing gap emerged after the financial crisis. It empowers a cooperative lending ecosystem, where resources smoothly flow from savers and investors to families and corporates thanks to revamped lending capability. This spurs growth in the real economy and generates more resources which flow back to savers and investors.

The Prototype

MSD Solutions has developed the following prototype:

LoanXchain

We developed a platform to enable the exchange of loans between financial institutions. Every user account is linked to an institution and has authorization to execute actions that have material impact on the Institution loan portfolio.

LoanXchain platform is a web platform that communicates through the web using encrypted communication.

During the program, from a technical perspective we focused on core platform development and product extension to SME Italian loans. We defined and developed SME loan templates and integrated loan scoring value-added services.

From a business perspective we refined the business plan and corporate presentation, onboarded two with institutions and succeeded in business development with SMEs in the program
