

**Food provenance certification
powered by trackers, sensors,
and blockchain**

Sintra, Portugal
Established in 2014

Sensefinity

Is your company fully digitalized? Sure, front, and back office probably are. But what about logistics? Do you know where your products are always? And in which conditions? Temperature, Humidity? Did someone steal it or broke it? Whenever it is vaccines, organic food, or luxury products you need to monitor closely the location and conditions. Sensefinity offers a complete blockchain-based real-time sensor solution. Let's turn your Logistics visible!

The Prototype

Sensefinity has developed the following prototype:

Food Provenance Certification

This is the century of consumers. They demand that products have quality but also that are produced with high standards for ethics and within a sustainable process. To make sure that the food we have on our plate don't come from deforestation farms or from heavy environment exploitation we must monitor food production and distribution. Sensefinity developed a set of sensors and trackers that register the location and the conditions of biologic products transportation. All this information is then recorded into a blockchain making it immutable and auditable.

Food provenance is guaranteed creating an environment of trust between food producers, 3PL operators, retailers, and consumers.
