

Polaris Tx, put a seal in your business

Seville, Spain
Established in 2015

The company

Sixphere is a team focused on helping its clients through the digitalization processes. We are specialized in industrial digitalization providing Polaris Tx as a platform to perform that digitalization on production control, quality control and supply chain control contexts.

Best solutions for digitalization projects, aligned with business strategies, is the core support we provide to our clients, using innovation and technology.

Meet the team

Jesús María Jurado
Co-Founder. Business and Sales

Alejandra Rosa Prado
Co-Founder. CEO and Finance

José Antonio Mora
Co-Founder. Marketing

The Prototype

Sixphere has developed the following prototype

Polaris Tx

Polaris Tx is an on-cloud service that allows you to register your business transactions data into a trustworthy site, sharing them with your partners. The data structure of those business transactions can be designed by you, so you can implement a full interoperable environment with your partners.

Polaris Tx tries to solve very simple problems: you need to register, together with partners, your business transactions, providing your own data schemes, and integrating your existing systems for massive operations.

This is done using blockchain and IPFS to build a trustworthy network, using JSON-LD to build your own data schemes and semantic interoperability, and APIs and Kafka to build an integration layer.
