

COMPANY PROFILE

Comunitaria

Local tokenized economies

Seville, Spain
Since 2020

“Rooftop that Feeds”

The company

Comunitaria de Servicios a Comunidades SL is a limited company registered in March 2018 in Granada, Spain. It’s main activity is online management of Homeowners Associations, for that purpose it has developed its own software for a SaaS (Supervecina) and also software for a building IoT hub (Patio).

In this document, we’re presenting “Rooftop that Feeds” a Corporate Social Responsibility (CSR) project of Comunitaria, that may become a company on it’s own.

The Prototype

Comunitaria has developed the following prototype

CTO

Rooftop that feeds

Vision. To create a tokenized local economy with social impact.

Mission. To have a positive social impact in the most disadvantaged neighbourhoods. Our project values:

- To promote the economic recovery of local trade in the neighbourhoods.
- To use solar energy to recover economies.
- To help the neediest families to improve their diet by consuming local fresh products.
- Transparency and trust.
- Commitment to the UN’s Sustainable Development Goals.

We propose to use these donations to buy solar cells for the rooftops of the neighbours, the electricity produced is then sold to the local commerce, the local commerce pay this electricity (to neighbours) using a digital token (instead of Euros), neighbours use the digital token to buy fresh food at the local commerce. Donation has a recurrent production (in local fresh food) equal to the lifespan of the solar cells.
