Xylene

Boosting Trust In Raw Materials

Xylene helps companies in markets with regulated raw materials and complex supply chains to build transparency by linking supply chain management with space technology, Satellite Navigation and Earth Observation, and blockchain that drives compliance, traceability, and customer engagement. Providing trust in the movement of raw materials along the supply chain.
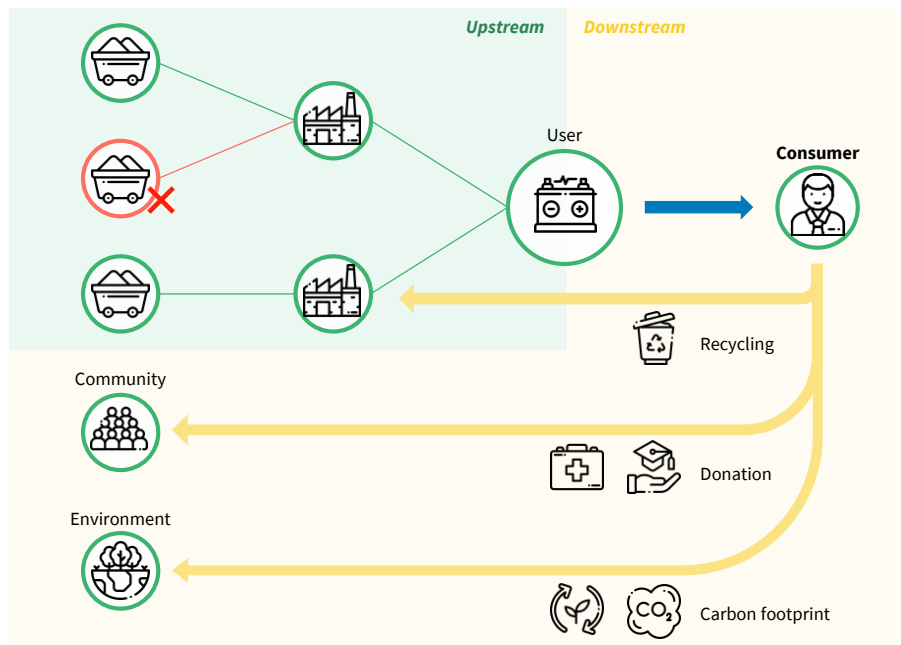

Benefits

- **Compliance**
- **Transparency**
- **Insurance against exposure**

Xylene allows responsible sourcing by visualizing the upstream supply chain and connecting companies for easier due diligence. This transparency enhances the internal understanding of provenance and delivery status, while communicating this story directly with customers and consumers. We allow companies to set themselves apart and provide a proof of integrity and sustainability.
